A general internal medicine doctor, also known as an “internist,” is a doctor who deals with the prevention, diagnosis, and treatment of adult diseases. If you were seen in our hospital by a “hospitalist” you would then follow up with an “internist” in our clinic. Internists are equipped to deal with whatever problem a patient brings — no matter how common or rare, or how simple or complex.

When to see a Primary Care Physician (PCP)?
- Common illnesses  
- Physical Exam  
- Pre-operation  
- Travel medicine
- Women’s health
