

DEVELOPMENTAL-BEHAVIORAL PEDIATRICS FELLOWSHIP

The MU Department of Child Health offers a unique three-year Developmental and Behavioral Pediatrics fellowship accredited by the Accreditation Council for Graduate Medical Education (ACGME). The program accepts one fellow each year.

CLINICAL OPPORTUNITIES

- More than 13,000 patient visits and 500 diagnostic evaluations performed every year.
- Specialized clinics including Down Syndrome, NICU follow up, and Cerebral Palsy.
- Learn to work with and lead multidisciplinary teams providing specialized assessment and care for children with a wide-range of neurodevelopmental disabilities.
- Applied Behavioral Analysis providers and clinics available on site.

SAMPLE RESEARCH OPPORTUNITIES

- **Dr. Kerri Nowell** - Innovative evaluation of young children with neurodevelopmental disorders.
- **Dr. David Beversdorf** - Effects of pharmaceutical agents on cognition in autism and in stress.
- **Dr. Stephen Sheinkopf** - Identification of very early signs of autism in infancy.

WHAT SETS US APART

- Research grant available that is exclusively for DBP fellows at our program.
- Advanced training in administration of developmental assessments (including research reliability on the ADOS-2).
- Opportunity for special elective rotations, with travel stipend, at partnering locations across the country.

PROGRAM LEADERSHIP

Benjamin Black, MD - Board certified developmental-behavioral pediatrician
